

# Transparency Reporting Managed Services

Our Managed Services offering reduces the operational burden of staffing a federal and state reporting team. We help clients collect, review, remediate, and report data in a timely and cost effective manner.

## Support to Fit your Needs

**Are you or your employees spending too much time completing transparency reporting requirements?**

Let our transparency team alleviate the resource burden so your team can focus on more strategic priorities.

We leverage a team-based approach to match the skillset of the resource to the task being conducted. Our team ranges from business analysts skilled at identifying data errors to project managers capable of answering the hardest questions posed by senior management.

## Industry-wide Software Expertise

**Regardless of your transparency technology or software, we can provide support.**

Our team is experienced utilizing third-party industry reporting software, company proprietary “home grown” solutions, or alternatively we can configure a process and technical tools to collect, aggregate, and view your data.

Our broad experience allows us to easily adapt and execute based on your specific reporting requirements.

## Our Services

### Collection & Error Remediation

We work with your internal teams and third-party vendors to collect data for federal and state transparency reporting, run accuracy and completeness checks, and remediate any discovered errors or discrepancies.

### Data Validation & Sub-Certification

Our team generates preliminary reports for data review and validation to prepare for submission. As part of this process we create sub-certification reports for dissemination to internal teams and third-party vendors for review and certification.

### Open Payments & State Law Reporting

Our team will perform all aspects of federal and state transparency reporting including registration requirements, initial report submission, error remediation, and generation of management summary reports.

### Dispute Resolution

What do you do if your data is disputed? Our team will manage the tracking and review of data associated with disputes and provide recommendations for managing follow up communications for each individual dispute.
