

Transparency Managed Services

We reduce the operational burden of staffing a transparency team. Our team-based approach includes experienced project managers to keep you on track, business associates skilled at identifying data errors, and subject matter experts able to answer your most difficult questions.

Full Service with WholeSum™

We use our own internally developed solution (“WholeSum”) to fully outsource reporting.

Our team will collect, review, remediate, and submit your data to CMS. We also provide all applicable state law reports and access to your data via easy-to-use dashboards.

Support to Fit Your Needs

Are you or your employees spending too much time remediating errors in an existing system?

Our broad experience across all third-party industry software allows us to operate any third-party tool efficiently. Our transparency team alleviates seasonal resourcing needs so you can focus on strategic priorities.

Our Services

Collection & Error Remediation

We collect required data from your internal teams and third-party vendors, run accuracy and completeness checks, and remediate any identified errors.

Data Validation

Our team generates preliminary reports for data review and confirms submission readiness. As part of this process, we provide draft reports for the client to approve.

Open Payments & State Law Reporting

Our team performs all aspects of federal submission and we provide our clients with information needed to complete state transparency reporting.

Dispute Resolution

Our team manages the tracking and review of any received disputes and provides recommendations for managing follow-up communications.
